

Our bottling lines partners

Filling and capping/Seaming

Counter-pressure and volumetric fillers for cold and hot liquids, carbonated and non-carbonated | Type of container: aluminium cans | Speed : 3,600 up to 55 000 c/h

Can Warmer & pasteurizer:

Can Warmer: using hot water or steam, we gently treat bring the containers (glass, cans, etc.) to bring them back to room temperature (preserve product integrity)
Pasteurizer: after capping, containers will go through 8 gradual heating/cooling zones with a dynamic and active PU control system to assure the pasteurization tractability and quality of products.

Cartonner

Automated equipment for the grouping of 4, 6 and 12 products per carton | Speed: 15 to 35 packs /min. | Type of container: aluminium cans of 12 and 16 oz, etc.

Conveyor and automation

Single or mass conveyors, accumulation sections, elevators and other mechanisms for empty, filled, grouped or boxed containers

Depalletizer and rinser

Depalletizer: stainless steel equipment designed to push layers of containers of different sizes | Speed: 30 to 300 c/min
Rinser: by ionized air or water jets to remove debris from containers

Palletizer with integrated stretchwaper

Compact palletizer with integrated layer per layer stretchwaper for handling boxes or trays
